

eLearning Course Intern, San Diego

ScienceMedia provides clinical and medical multimedia educational content to life science companies, to enhance clinical competency throughout their organization. We also provide a cloud based learning library, SMi Source, that enables anyone to search and learn from over 14,000 interactive topics and hundreds of courses. In other words, *we teach complex science simply!*

ScienceMedia is looking for a skilled eLearning Course Intern to join our growing development team. In this role, you'll use your creativity and experience with rapid authoring tools to help develop engaging self-paced eLearning modules for life science topics.

Essential Responsibilities:

- Assist eLearning developers in developing eLearning content
- Create scientifically accurate illustrations under the direct supervision of an eLearning developer
- Create tables, graphs, and infographics as needed
- Assist eLearning Support Specialist in updating Source content
- Perform other duties as requested

Requirements:

- Familiar with Adobe Creative Suite (Photoshop, Illustrator, Flash / Animate, After Effects)
- Familiarity with Articulate Storyline 360 a plus
- Interest in eLearning and / or science
- Quick learner
- Excellent communications skills
- Excellent multi-tasking, analytical, and organizational skills
- High level attention to detail
- Strong time management skills

Benefits:

- Casual dress code
- Teamwork environment
